A 'tiladelobia gentleman who has recently come to reside among us, thus describes our town in a letter to Forney's Week y Procest

COLORADO SPAINGS.

"This slace, just'y admitted to be noth in itself and in its location the most beautiful city in Colorado, is situated on the Denver and Rio Grande Railroad, about seventy five miles south of Denver. The site was chosen and the city projected by severa Philadelphia gentlemen, who formed themselves into "The Colorado Springs Company," and this month four years ago laid out the town. The spot was well chosen. From a green rising slope in front, at the distance of three miles, the blue Rocky Mountains gradually rise before it. Besides the beautilu view thus offered, the mountains temper the blasts of winter and delightfully cool the breezes of Summer. I think the design of the founders was to make it a city of homes. The streets are laid out at real angles, fined with thousands of shade treef, and are from one hundred to one hundred and forty feet wide, and as level as a billiard table. 'he principal street and drive, Nevada Avenue, is a not el. It is one hundred and forty feet wide, two rules and a half long, and as level and dry as a race course. The residences, school houses, c jurches, and stores are tasteful and heat. There are about one thousand buildings now erected and in course of erection. In the short time that I as claused since the birth of the city the population' ras sprang up to four thousand. Several good hotels take care of visitors, and as it scalways a matter of mquiry among travelers which is the best, I have found the Crawford House most patronized, and justly so, for without owing mine host any favors exact of the kind and raceful attention which he bestows on me in cottinion with the rest of his

guests, I can say that it is the best house I have jut up at in the Territor. None churches in this little city are an evolence of the character of the population. The you@ful idea is taught to shoot in a number of schools, while the finishing Contracts Taken for Buildings in ENSIGN & PECK.

Settimates made. Mater al furnished ister, a seeliskuown Priitas etphian, are ilouristr ing. Dustiness is brisk despite the dull times, for this is the depot of supplies for the maning regions to the west throngs I se Pass, the ranches on the plants and in the villeys hereal out, and the hitters and private residences at Manaon, the

celebrated wanting place in the variety. Two bright newspapers, the Colorado Springs Gazette and the Memoranier, are published, The schooly is named and cultivated to a degree that is surprising. It is advounted for by the fact that a rarge proportion comusts of retired , profess onals and mercian s, who have retired from the debilitating atmost here of Eastern edges to enjoy hie fit they bearing change. To sum up, that is ensurently the city for those who desire to live elegantly and condortably, especially for those worn out in the East. The dry, a public climate both in Summer and winter, the baths and springs at Munton, the unequaled scenery ORNAMINE I and spots of interest within a few index, among which I may cranerate Mainton, Pike's Peak, and Special of the Code, ofen Eyrie, Cheyenne Can see force of the Code, ofen Eyrie, Cheyenne Can see force of the Code, ofen Eyrie, Cheyenne Can see force of the Code, of the Special Eyrie, and Bergen's, or Mainton 'Park, omfened with the cligance, benuty, and good management of the town, will make it the Strategy of Colorado. In my next I will give 'your readers a further idea of this locality, particularly of the Special Code and this locality, particularly of the Special Code and the code of the Special Code and the Code and the code of the Special Code of the Special Code of the Special Code of the Code of the

ticularly of the Springs and scenery at Mainten. WAS TAXNERSO FRANCES.

The Train Regalitus summares there ports of crop prospects in the leading grain growing regions of the West:

With the The reports a early indicate that the acreage of wheat this year in the Western States is much doss than lest year. Thus in Himos but three reports in Late increased acreage, while twice as many show but one half as age, while twice as many snow our constraints, for even less, the Wisconson no report shows an increase, but two, an equal average, and the constraints one half. In while seven show not moretthan one half. lows yearly the same concrion is shown, Ma big in the acreage was not materially reduced. In some of the newer States increased acreage is reported. As to condition the reports are not unfavorable, a majority of all the reports indicating at least an average erudation. Michigan

makes a poor showing, I liners stands well. Wesconson and Iowa very la gely, but the general average is not bad. Cost. Undoubledly the facreage planted to com in the West was larger than in any former year. In Illinois np report shows less Bow ing A ey anc. Billiard Mail Gold, Plated, and Jet dewelry, Necklaces, acreage than last year, most an increase of 20 or 25 per cent. In Iowa the same is true, with several reports of an increase of at least 25 per cent, in sureage. Michigan and Missouri also show a considerable increase. The reports of condition are not as good as is desirable, but it is probable many of the unfavorable reports in-dicate biteness of the crop i ther than had con-

dition otherwise. Bearing in mind, the compar-ative quantities grown in the different Sintes our reports show a prospect at middle of une of about four-fifths of an average crop, . Oxis. The acreage in toals is considerably increased over that of last year, un the general

prospect is of at least a full average erop. Hit-nois gives acteral reports of less than average conducts. Machigan, Washinson, Towa, etc., in nearly all cases showing, good prospects. Bantity. Himore shows a reduced acreage, Iowa, Wisconsin, and Nebraska an increase. The prospects for a crop as a whole is be now an

average. FLAX. Almost without 'exception, where reparted at all, an increased acreage of that is indicated, with very good condition. GRASS AND CLOWER ... here is a large in-

Por viors. There is an increased acreage, and at least average concurn. INSPORTANT RIES. In very few cases is an increase of mjury from insects, compared with last year, reported. Of course this does not include the grasshopper districts, but there are many more cases in which the grasshoppers have done less injury than last year, than where they have

done more. Cinch and potato ings are very plentiful in many places, but as a whole, not so numerous as last year. It is a cause of rejoicing that although there are a few regions in which same crops do a poor showing, and in a number of loca tries most crops look unpromising, the genera crop parapects, especially in Illinois, Michigan, Iowa, Kansas, blusours, and Nebraska, are of an aggregate full average yield of the great arm staples.

NEW STYLE OF PATER CRANS. O.A.T.:

The syenite monolith snown as Cleopatra's

need e is to be transported to London b sea, hy cashing it in wood and rolling it overhoard. To make it float properly, it is to be covered with timbers and planks till the looking is arge enough to fost stone and all. To compensate for its tapering form, one end is to be made larger than the other, and when fir ished, the timber cressing will be something over twenty feet thick at the larger ent. The ents will be ta sering, to assist the steamer in towing; and even if the cigar-shaped museury runs aground, its casings will save it from harm. The most riskful part of the voyage will be the launching and the rolling ashore. In this connection it may be noticed that cylindrical or ers are transported through the canals in Ho land in somew rat the same way. The fues are a ugget up with wood, and the steam openage are covered with air-tight caps, soc, when well rainted with red lead, the floriers are rolled into the cana s, and, behind a steamhoat, make twir voyage in perfect swely .- "The Vorld's Vork!" Scribner for August.

COLORADO SPRINGS - COLORADO. punctual, int a little bevore land.

NOMAN AGENTS.

3 y opinion is, that the salary of Indian agents should be increased to such an amount as will secure men of first c ass ability to discharge the delicate duties intrusted to them. The aresent salary of agents \$1,500 per annum brings into the field three classes of men, not any one of which furnishes the kind of men needed, vir worthless men, with too little ability to make a living at home, who have no idea of the real duties of their position, and who fail to gain the confidence of the Indians, and, at the same time, are too weak to protect either the Covernment or the Indians from the bad white men of the frontier; who think it no sin to rob the ablic treasury, to steal from Indians, and too often to take such action as will lead to Indian outbreaks. in order that they may profit by the increased

exponditure. The present salary of agents opens the dopr to another class, who he and cheat to gain their positions, two often joining churches for no other buch men take the place to make money out of it, and are entirely unsurupulous about the means they employ. Certainly Indians will not be improved by such agents. Atlother class, and by far the best, consists of

men whose health has broken down in the last, and who accept these positions to secure a change of climate. But this is not the kind of men ineeded. Among so many, there are, of course, some suitable men. The position requires men in full vigor of manland, well trained in business affairs, with I mind, heart, tack and ju ignient summent to un-derstand the people placed under their care, and

to secure their good will and co operation in the reforms they are charged with making. Such then can be found, but they do not work to Vich. \$1,300 p.r. mma3. the Government many thousands of dollars each year, and under his management the Indians would rapidly advance toward a position of in dependence, in which they would sustain them.

The method of appointment, a lopte ! tresident is one that must commend stell to do men who desire the welfare of the Indians. if the religious hadips making the side: would take more care to impure into other herresary qualifications busides mere piety forcer ould till many of these places for Angust.

 $\{A \in X \mid AX^{(i)} \text{ ORAL! ONS} \mid X \in A\}$ ROCKY MOUNTAINS.

The first explorations of the Rocky Mountains and into the values of the South Platte, rate as a far back as 1543-4, as per Coronado's Novage; territory compared by New Mexico, And ma agent to the extend of \$850 fce and yell against one Colorado. As the result of this Spanish expedit general fifthe again to the sizes. Mr. Turn never led to any enous on their part to colonce any portion of the vast region north of the Arkansas, we can only add that it gave the old has for the at the ground world some knowledge of the great places of the leaders to be an all the Missouri, and of the countless them of the trades a place to be out. The g porations of Pike in 1850 7, of Major departures a part of a ong in 1820 1, and of Fremont in 18,2%, give avail we could expect from such right Adleys, and thus it remained until 1858, when they would fur the first the discovery of gold in the vailey of Clear man they will the test to the first the discovery of gold in the vailey of Clear man they ack they were

exploration and settlement. Colorado, of old, was comprised in what was to the eight a law are general known as the Louisiana territory, which was self by It naparte to the United States in 1853 for the sum of \$15,000,000. The country comprehended in this purchase included not felly the State of Louisiana, but also all the country !the north and wast between the Massuppr and the Pacha, elcepting such perfores as were then occupied by the Mates of Arkansas, Wisconsin, Joua, Nebraska, Kansas, Colorado, the greater part of Minnesota, and what is now the Indian Terribry. By the act of Congress of March 20, 1804, the terribry was digned into two governments, that of Orleans, including the present State of Louisiana, and that of all the country north and west of it. The Territory of Orleans was a imitted into the union under the tale of the State of Louisiana, in 1812, and to the same year they territory before known as

Louisiana had its ce ignation changed to Vis-

NO SC TOO IN ASSIST WANTED.

Some years ago a party of emigrants from Olino and Illinois settled in a little town in Texas, and soon began to agitate for the crection of a school house and the employment of a teacher. A town meeting was catteil to consider the propesi tion; and one of the Northerners made a near little speech, telling the bassings which educa-tion had brought with it to Ohio and Himos-When he had sat down an old man in the corner arose, gave the castomary bitch to his cordar ys, pushed back his hat a tribe and answered thus : his glittering eye, made his speech. "See here, mister, and tyou the machine man?" "Yes, said he, "I did sell some machines here last year." "Wa'at, when the wheat got sipe, all crease of acreage of grass and clover, and the i the people went to neighbor obnoun's to see newly sown is generally in the condition in bow yer moving machine would operate. We not the tairnal thing into the field, and neighbor others in the field his young tilly into the shales, She alters was a frictions critter, and the first thing we knowed she gave a "laince and caught neighbor otherses's boy bid's leg an curn clean off." Mannest sensation. Then, mister your pardner come around peddlin' wooden leg, and neighbor come around peddlin' wooden leg, and neighbor come around peddlin' wooden leg, and Nice edicated people you are! You understand it, you co! cust you sell, the machines, and then yer pardner, he furnishes wooden legs." his ende i the matter, and no schoolmaster will be welcome in that village for some time to come.

- San Antonie Herald. CORN-FLOUR IS NOT YOUD.

A start ing event has lately taken place in ingland, which, though in uself very shocking, may have a good result in saving the lives of . many children. A married woman was tried for murder, the charge being that she has eaus ec the ceath of her twin children by feeding sabundant wherever water, in he used for irrithem "corn flour," after being warned by the physician that it would not sustain life. The ury took a merciful view of the case, and acquitted the unfortunate woman. The occurrence as called forth much comment. A obysician

writing to the Tines, remarks : --"It cannot be too widely known that "corn. flour" fer se is not food, but pure starch, pre-pared by washing out o maize flour the autriive sortion with alkalies. Numerous instances. of chi dren being reduced to skin and being from being fed do one or the other of the 'corn flours' before the public have come under my no. tice. It may be of some use to your readers to have a 'rough and ready' test to distinguish those farmaceous foods which are innutritious. Whenever the powder is beautifully white and of extreme fineness, the article should be reject. ed, as being almost certain y composed o starch alone. When however, the nutrition has not been sacrificed to appearance, and they present their tatural brownish color, some or these foods mail contain even more troucishment than meat."

O course, when the comptone is cooked with while, this wis so op a some of the naturality that is want ng; but the warning which is given the sure. Make it your own me not one to be fully needed by those who have charge of hid-

The sail at this time was critically a total owner in the month of lune, of one of a conditionals of cottonwood lifted with seek, in speciel over the ground striking the same exercises steps, the seed decame generally instributed, and the result is the beautiful gross mentioned. None, is not this enough to be come for retrain ten heart repeated by those timering for symmething to turn in the rotation of crops,

> The Royal Family of England have their re-Laton pretty well divided up aining he surrous curches, according to the followin account; "Queen Victoria is the legal head of he lopiscopal Ghurch of singland, and the Bressylerian Church of Scotland. When she is n lingland her Presbytemanism is technically called dissent, and when she recrowes the weed into Scotland her Episcopalianism becomes thissen? there. She has a morised harred of retualism. The Prince of Wales is inclined to ritualistic cer-emonies, whilst his eldest sister, the "incress of Germany, is a Lutheran, his brother in-law, Lord Lorne, a Prespyterian; a sister o law, the Duchess of Edinburgh, is a Greek Catholic; her husband is a Low Church Epseepalian; the other brothers and sisters are Episcopalians and Presbyterians by turn—their particular creec dewhich apost their residence for the time being. The Princess of Wa es is naturally bewitteren as the manifor religious of tergoys relations, and clings to the aith she was taught in Jenmark."

GOLD AND STAY REN COLOR RADO.

COLOKADO SPICINOS, june 11, 1875 I arrived in this Territory three weeks ago-My errand was not to seek silver or gold, but health, and I think I shall not be disa spent a month here in 1872, so that I am able to see the progress that has been made in that time. Here at this beautiful resort of those seek

health, grand scenery, recreation or the

ing health, grand scenery, recreation or me hidden freasures locked up in these stupendous mountain ranges, the signs of prosperity are Colorado Springs's the name of the town

where I am. The springs which give it its name mountain views, and invite the citizens are five miles west, in a romanuc mountain gorge, in which several line hotels and many beautiful dwellings are scattered, making a hamlet of rare beauty called Mainton the name: of the Great Spirit in the Ute dialect. This town is on the Denver and Rio Grande Radway (narrow gauge) 76 miles south of Denver, in a valley entire v new styre. Or also County, o plan of surpassing beauty, bounced on the will be the path or reading to all these poxes are constructed of the pest, west by the hold and rugged front of the mount there. With regret I responded to the tains, among which Pike's Peak rears at holy have tony " There are day less to snow that head directly opposite and in full and thousant volumes of useful looks in FUP near view. Unithe west, four or tive indes dist Courts house who to be owners world glotts occ with two fat toys. The ha ots tant, a smooth, graceful and grass crowned high exchange for some one was regarded one of the arms a perture secured, about too feet high, divides it from the great projectly conducted by the c are nated in a 4ma aperture secured, about too feet high, divides it from the great in a nation slid, operated from the ineastward. A fine mountain stream runs past the

> When I was first here in 1871 about a dozen buildings had been erected. Some families were living in tents; but a good segmning had been we threads possess mage. In the following year I was here again.
> Then more than a thousand people were comfortably housed and work was going on briskly.
>
> Early 1 - X - A Death S. P. - A Death the slace has assumed the appearance of a city. ing up. Indeed it is fast becoming an important ness place. Several church edifices, some of them very pretty, and a splendid stone school house adom the place. No drinking houses are

incensed here, so that sobriety and good order prevail. It may be asked, what built up and what keep up such a fown away out here. The springs in part; but Manitou reaps the greater part of that benefit. It is the numerous and rich mines of the mountain region, many of which draw their supplies from here, as those farther north draw

thens from Denver. But I have said more about this one locality great mining interests of this Territory. of gold and silver, particularly the latter, are scattered all over the mountainous partion of this Territory, an area as large as the State of Penn sylvama. Good paying lodes, all vertical or nearly to, are numbered by thousands, and readiscoveries are made daily by the numerous prospectors who are scattered over all the moun

promises well he sinks a shaft into it ten feet deep. This the law recuires before he can take Unity United Dimorrow evening on claim, which is in all the counter 1,500 feet out and file a claim. long, in some 140, in others too feet wide the en-150 on each sule of the centre of the lode, which is a most always straight. He then has his claim put on recording the proper county. To have this claim the law requires that he shall put on the Congregationa Churc's Sunday

Then, if he has not capital himself to operate it upon the market. There have been many such agencies in this Territory; but the trouble There have been many m. Services will also be near in the pro serty on the market at their dwn prices, and not at the price fixed by the real discoverers and owners. For example, the owner of a name may a more but, alas a one more specimen in go value his proper y at \$10,000; the agent, or asociation of agerts, but the process to \$50,000. or \$100,000, and if by any means they can in duce some capitalists to take it, they socket the difference. In some cases ores, and askays of parties to purchase. Thus for years this business was characterized by swindling and feabil, and fell into had repute.

To remove this monstrons eyil, good and wholesome laws were enacted by the Territorial egislature, and imming agencies conducted on the strictest principles of lusiness probity, wrang up. Perhaps the soundest and most reliable of these association is the Colorado Springs Mining Agency. The prices fixed by the owners of this kind of property are published to the world, so that no one can be swindled by inflated prices: while reliable agents in the several mining districts examine the property and report upon its We re mint the following encouraging avalue in respect to the assay and chantity of the ore, and all other facts of importance to the purchaser. In this way mining property in Colorado can now he purchased as safe ming lands and coal lands can be purchased in the lastern States. Further than this, before a contract is fully consummated, experts chosen by the agency or purchaser, or both, examine the premises, test the ore, and report upon all tacts bearing upon the case.

'revious swindling and randulent practices, by which the reputation of this Territory had been so long and so deeply injured and its prop-erly retarded, induced gentlemen of unquestion-able probity to associate themselves, together inefforts to regain the confidence of the work, and o' those 'e porter or the first in of a a good degree o' success has already been mit

The cuestion will arise. "If Co oracle is so nocuet greater?" The answer is blem. A argo ma only of the men counted as miners are not ing more than prospectors; they are not producers at all; yet their vocation is one of great importance, and the first step in the devepment of this interest. By their abors not less the mancia storm, sit ley wi come than eight thousand distinct claims have seen out o it in a much better concision to extered and but on record, and the number is inwe .. many of them enormously. But he of these men have durits, to oversie their mines if they were so inc ince, so they put a price alon

them and scove them a rota the market, and ther t Nove for others : Isome own several mines and er one or more for sale in order to raise capita to enable them to work others. Giten the price fixed upon them dges not amount to more

than one per cent, moon their real value. Many mines are yet difficult of access, particu arly in the San uan country, probaby the richest district in Colorado. To save cost in carriage concentrators are used -a simple kind of stamp mil' of sinal cost shy which avesixths or more of the waste matter of the ores to Taken out generally by washing. This a ton of W. S. Hoot, o' Oregon, writes as ore, worth say \$100 as it comes from the mine. reduced to 333 powm ain weight, while its value is undiminished. Such concentrated ore will bear transportation over ling difficult roads at a good profit; for the cost of mining is from three to twenty dullars per tem, and of concentrating from one to three, Where the cost of mining as 'a. high as \$20, the ore is generally very rich, the al being concentrated into a thin year, while in other mines it is a flusch through the entire

> If the percentage which ores now smeated in the territory yield, I have made careful inquity. te range is very large. Silver runs all the way from \$20 per ton, which pass in a well descloped mine to \$3,000. A majority of those worked run over \$75. Gold funs from \$20 to \$10,000. Silver lodes are much more numerous than there of gold, but some of the auriferings canter in very rich, as high in some cases as \$10 000 per

I have seen many of these prospectors. Asclass they are hardy, intelligent and energetal tome are rough and tude, but they are exceptional. One is talking at the table as a write, and his conversation indicates a well educated. gentlemanly and sensible man. Atthough no est producers of wealth that tells upon the statistical tables of the territory's productiveness, there is no more worthy or useful class of mein this rugged region of peaks, garges, and can one, and east hidden treasures

The production of gold and oliver is fact by coming a steady, logitimate and mofitable franch of national industry as true a development of our national resources as the growing of grain, the manipulation of textile fabrics, or the smeit ie exception of fringat; there is not jog of iron, and its conversion into useful form Like the oil business of Fennsynamia, it was a first characterized by wild speculation and de-Sarings, in waich more than one news-paper is bublished. The or has the will soon take a high place among the produc-

They set us a weekly paper—and a very cred-

thable looking paper it is—used it to advertise the town if Sagauche, and by the exercise of a great dea of energy and no little shrewdness they disposed of the town lots and brought in

ettlers. About one half of the hundred houses

in the place are adobe, this is a word which

sounds well, and in its usual translation of

"san-dried bruck;" it sounds well too; but in

p ath English adobe is mud; and it stands con-

feecel, a ter a house built of it has been beaten

upon by a few ram and snow storms. It is,

and certainly it speaks well for the energy of

the people here that they have done so much

for a place which had no mining excitement or any extraneous and ro start it. Mr. Mears, one

of the originators of the town, the owner of

the land, the man store keeper of this region,

and the oldest settler, claims that he does a

contour bie, but excellent. The cheerful wood
